

Warranty KRINNER GROUNDSCREWS

KRINNER Schraubfundamente GmbH grants a warranty on its KRINNER ground screw products used as screw pile foundations anchoring super structures in the soil. This document grants a warranty against reduction of the inner bearing capacity through effects of corrosion. Therefore a valid warranty claim only exists if any kind of corrosion negatively influences the inner bearing capacity and / or the functionality the product necessary to support the super structure mounted on / anchored with the KRINNER ground screw.

This warranty is granted for a time period of thirty (30) years as of the installation date of the very KRINNER ground screw. This warranty is based on the soil evaluation values according to the German standard DIN 50929-3: 2018-03, value $B_0/B_1 \geq 0$ and on atmospheric corrosion according to DIN EN ISO 9223:2012-05 category C1-C3.

Furthermore, this warranty does not cover any damages or corrosion resulting from any mishandling or negligence of the KRINNER ground screw during transport, storage or installation.

In a warranty case, KRINNER Schraubfundamente GmbH is entitled to ensure the stability of the KRINNER ground screw by repair, rework or replacement. Costs resulting from transport, removal, replacement of components are covered by the present warranty.
